

ADVANCED MASK TECHNOLOGY CENTER

TOPPAN
TOPPAN PHOTOMASKS, INC.

A Technology Alliance for the future

Internship (f/m) End of Line Module

In the scope of your university studies you have gained sound theoretical knowledge which you would like to apply and broaden. Would you like to take up the challenge of working in an innovative, goal-oriented environment of an internationally operating company? If so, our company is the right address!

As a member of our team in the End of Line Module you support our engineers with all challenges of their daily work.

Your responsibilities include:

- Support with the implementation of experiments
- Data collection, preparation and analysis
- Physical characterization of photomasks
- Working in the clean room as well as in the office

Your profile:

- You are a student in natural or engineering sciences or a related field and possess comprehensive knowledge.
- You have the ability to work with MS Office and have basic knowledge in one or more programming languages.
- You demonstrate strong communication skills and are able to communicate with colleagues, customers and suppliers in English as well as German
- You like to work independently and responsibly in a team-oriented and international environment.
- You are able to work jointly with our team for at least 4 - 6 months.

We offer:

- Working in a worldwide leading center for the development and production of highly advanced photomasks
- Wide range of exciting challenges in an international und motivated team
- Family-friendly corporate culture
- Range of corporate preventive health services
